H. S. BROWN,

March1 NO 4 EXCHANGE STREET.

New England Roofing Company,

MANUFACTURERS OF

WARRENS' IMPROVED

Fire and Water Proof Composition Roofs,

Office—7 Liberty Square, Boston.

THIS Company would respectfully solicit the attention of Builders, Architects, Manufacturers and the Public to their new & approved system of Roofing, which has been very generally adopted in the cities of Buffalo, Cincinnati, Chicago, and St. Louis, and within the last year in Boston and vicinity, where it has given entire satisfaction. It is rapidly superseding the use of all other Roofs, and is confidently offered to the Public, as a mode of Roofing unobjectionable in every important particular.

The materials employed are none of them subject to contraction or rusting, hence are tight, nor will they expand and contract with the changes of temperature like tin and iron, nor shrink in dry weather and swell in damp, like shingles, and other wood coverings.

It combines in a great degree than any other Fire Proof Roof now in use the valuable requisites of cheapness, durability, and security, against both Fire and Water.

These Roofs require an inclination of not more than one inch to the foot leaving it in good condition for a promenade for drying purposes and is of particular advantage to adjoining buildings in the event of Fire

They are afforded at a much less price than any other Fire Proof Roof. The amount of material saved and which would be used by the old method in raising the walls and framing a steep Roof, still further reduces the cost of the building

Another advantage is had in the securing of rooms in the Upper Story, of the same dimensions and quite as commodious, as those in the lower part of the building. I so expect of a three Story building, with this improvement not being greater than that of a building of two stories with the pitch Roof. There is further saving in the cost of Gutters

These roofs are not affected by the jar of machinery—like those of Tin or Slate.

The Composition is so prepared that it is not affected by the extremes of heat or cold.

In case of injury from any cause whatever, no roof is so easily or quickly repaired.

Further information obtained by applying at the office of the Company's Agents

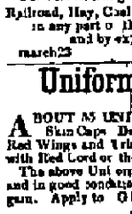
Admirable Invention!

JUST RECEIVED!

ANOTHER LARGE LOT OF

PATENT SELF HEATING

SMOOTHING IRONS!



MANY important improvements have been made since the beginning of the present century, relieving and facilitating the labor of men by machinery and by new modern implements, but few have been nearly neglected until the introduction of the *Patent Self Heating Smoothing Iron*, which will relieve them, in a very great degree, from the excessive and fatiguing labor of Ironing, be sides being a great saving of time and expense. This Iron combines economy, convenience, saving of heat, and despatch—one cent's worth of dry charcoal supplies fuel for a whole day's consumption. Here wood coal from the stove will answer the same purpose. It can be used in any room or in the open air. Hatters' and Tailors' Irons are constructed upon the same principle and possess equal superiority

More Bounty Lands.

BY the Act of Congress passed March 3, 1855, all Officers Soldiers and Seamen who have served FOURTEEN DAYS in any of the United States since 1790 are entitled to 160 acres of land if they have not received it. Those who have received 40 or 80 acres are now entitled to enough more to make up the 160. Those who have received 160 acres are not entitled to any more. The benefit of this Act extends to the widow and minor children of the soldier, but to no other heirs. Those who have been engaged in BATTLE are entitled to 160 acres, without regard to the period of their services.

Persons having claims under this or any other Act, will have them promptly attended to by calling on or writing to, A. L. RICHARDSON & CO., 11 Railroad Exchange, Court Square, Boston, who pay cash for warrants.

N. B.—We have faithful and experienced agents in Washington, and we make no charge in any case, unless we obtain the land

Opening a View of the Future.

The plan of campaign which was boldly cha ked out by Mr Collector Smart, but more dimly shadowed forth by the Democratic State Committee in their recent address, is evidently well understood by the hunker press throughout the State. The idea of a coalition or fusion with the Sirbiggins, either immediate or ultimate, runs through all their manipulations and forthcoast of all their plans. As indicative of these we find the following extract from an article in the hunker organ of Lincoln county, the *Newcastle Democrat*:

"The Slave Question.—The importance of the consideration of this question cannot be too deeply impressed upon the minds of the *free* and *slave* citizens of our State, as it is in that connection that the opposition to the fanatica and proscriptive policy of the secret political society which of late has mingled so largely in our public affairs is to be organized. * * * * The democratic party with the nucleus around which the opposition must gather, in order most effectually to resist the State from the present incompetent administration. * * * If the war any of the questions which have been at issue between the democratic and whig parties, which are still open, they must subside till the more momentous issues which are now against the public in all its fatally settled. In this view of the matter, we can say one thing that it is en rect, a thousand of more than one Convention * * * * * * The division, if made at all, must be upon mere names, for the interests and principles are common to all. Let us then unite, regardless of old party names, and work on right valiantly *together*."

This is good "fusion" looking, and likewise very proper advice. It is precisely what the Republicans of the State have done, and what the opposition must do. All who think alike must and will act together. Those who are in favor of prohibiting the liquor traffic will be found together, and those who are making war upon that system will as inevitably come together—and so upon the other living issues of the day.

"If that course is taken we shall look forward to a certain victory, which a different course will render doubtful if not impossible." This is the most powerful argument addressed to the lower strata of the opposition, and can hardly be resisted. There is no hope whatever of victory under any other arrangement. Come over to us, then, say these Know Nothing hunkers—take our name, let us go into business together, open a new *faith*, and divide the proceeds, whether they be profit or loss.

Those who do really think alike may very properly thus act together; but we opine there are some among the Straight Whigs whose principles, feelings and sympathies will lead them the other way—some who will prefer different company, and desire to fight under different banners than those of modern liberalism and northern anti-slavery Democracy. With such, it is to be seen only which divides them from the Republican party—and a contest for the mere name of Whig must evidently be hopeless.

Irving's Life of Washington.—Among the world of new books, none will attract more attention, or be more deservedly sought after than the

The life of the Father of his Country, written by the most elegant American writer of the age, will be one of the standard works of our literature, without which no man will consider his library complete. Irving's Life of Washington appears in three large octavo volumes, published by G. P. Putnam of New York. The subscription price is two dollars a volume, and, we understand, it is to be sold by agents only. The first volume will be ready for delivery in a few weeks; and subscriptions to that are now received by Alanson Lapelle, No. 2 Harlow's Block—sole agent for the work in Penobscot county.

Mrs. Johnson's Lectures.—The first Lecture of Mrs Johnson's Second Course on the Laws of Health, will be delivered at the City Hall, on Saturday afternoon, May 19th, at 4 o'clock. She would remind the ladies engaged in the enterprise, that the subscription list is not quite full, and that a little more effort on their part will be required to make up the sum promised Mrs. Johnson. Shall it be done?

One night last week, 11 sheep were killed by wolves, at or near Jerry Brook, in Ellsworth.

Polson Sentence, May 12.—Patrick Moran, convicted of selling spirituous liquor, was sentenced to pay a fine of $20 and costs, and be imprisoned 30 days.

Charles Dolan, convicted on two complaints of the same tenor, was sentenced accordingly.—They appealed.

Jeth—Joh Mahoney, for drunkenness, was sent to jail for 30 days.

Wm. Quinn, for an assault upon his wife, was sentenced to pay the cost of prosecution and to find sureties to keep the peace.

The Andover (Mass.) Advertiser learns that the late Mr James Johnson of Boston left an estate of $500,000 or more. This large amount is to be divided equally between his brothers and sisters. The two brothers and one of the sisters reside in North Andover. The wife of Rev. Asa Cummings of the Portland Christian Mirror, and the widow of the late Dr. Dale of Glastonbury, are the other two heirs of this property.

The new kind of fuel which has been invented by a New Orleans gentleman, and about which so much has been said, consists of 140 parts of fine sea fish, 30 parts of lime, 20 of coal dust, two of carbonate of ammonia, three of resin or pitch, two of climkers or iron dust, and eight of meadow. The whole is mixed together with water, and then dried in lumps.

Cholera.—The western papers begin to express the greatest fears of cholera, from the fact that it is raging with violence in many places near the Mississippi river. In Westport and Kansas City, Missouri, the disease has been suddenly fatal. The troops at Jefferson barracks have it among them, and the cry of a sick has reached Detroit and other like places, where the cholera carried parties and death last year, so that present quarantine measures are *everywhere* called for.

At the annual meeting of the Penobscot Mutual Fire Insurance Company, on Monday, the 14th instant, E. L. Hamlin, J. S. Sayward, S. F. Hersey, Brad ord Barlow, A. G. Wakefield, Charles Rowell, and R. S. Prescott, were unanimously chosen Directors for the ensuing year. At the meeting of the Directors, on the same day, E. L. Hamlin was unanimously re-elected President, and Benjamin Plummer, Secretary.

A ship canal from the St. Lawrence to Lake Champlain has been the subject of debate in the Canadian Parliament. The importance of the measure was conceded, and it was only opposed in consequence of the present embarrassed state of the treasury. The estimated cost is about $5,000,000.

We have on our list thirty-two subscribers who bear the name of Smith. Quite an encouraging number for one name.—*Machias Union.*

The Smiths on our list are very numerous and very respectable; but there are a few good fellows of the family for whom we could still make room

The two buildings erected for the World's Exhibition in Paris, cover a surface of 202,000 square feet, or more than 22 acres. This is 32,000 square feet larger than the London Crystal Palace. The great hall is *three-quarters of a mile long*, (3 950 feet,) and is the longest in the world.

The Baltimore Clipper Sun speaks in glowing terms of a specimen of the Chinese, a Chinese plant, in the garden of Professor Monkur of that city, which covers an area of about 250 square feet, and has upon it about 7000 flowers of a blue color, not unlike the lilac in appearance.

Maine Medical Association.—Ex-Governor Hubbard will deliver the annual address at the third annual meeting of the Maine Medical Association, which will take place at Belfast on the 6th and 7th of June next.

New Publications.

Bell Smith Among Illustrated by Healy. Walcutt, and Oth ers. New York: J. C. Derby. 1855.

This is one of the most delightful books of travel which has ever appeared. The writer, with a graceful and versatile pen, gives us the most lively and graphic sketches of scenes, and of Parisian customs, gayeties, and modes of life; and with true female tact and perception dishes up the oddest and most attractive bits of gossip, and while browsing an interest about matters and events which to a prosy masculine writer would appear too common-place or trifling for his dignified pen, still carries throughout a vein of the keenest feeling and the highest appreciation of the beautiful and good.

For sale by Patch & Lewis.

Woodworth's American Miscellany of Entertaining Knowledge. By Francis C. Woodworth, author of "Stories about Children," Theodore Thinker's Tales," "Uncle Frank's Home Stories," &c. With 1 illustrations. Boston: Phillips, Sampson & Co 1855.

This is a most excellent and interesting work, and of a character to be highly entertaining and useful for young people. The publishers say

"The plan of Woodworth's Miscellany of Entertaining Knowledge is not unlike that of its namesake originally published in Great Britain, and which has had a sale almost unparalleled on both sides of the Atlantic.

Woodworth's Miscellany is comprised in six volumes. Each volume is embellished with a handsome steel or cut mezzotinto frontis-piece, besides some fifty characters or engravings, illustrating the different topics treated of. Some of these topics and the following:

History, Biography, Travels, Geography, Charades, Anecdotes, Puzzles, Fables, Stories of Animals, Humorous Tales, Allegories, Vegetable Curiosities, Wonders of Nature, Wonders of Art, and Curious Things in General.

In short, Woodworth's Miscellany is a budget of Curiosities, from beginning to end. It has been the design of the publishers, as well as the editor, to make it a *library for the million*—a work entirely *American* in its character, which will be read with equal interest in every part of the Union.

For sale by David Ingalls & Co,

Tales for the Mariners. By Henry Grigg. Boston: Phillips, Sampson & Co.: 18-5.

A handsome volume of 448 pages, containing a large collection of Sea Stories, of an entertaining character. To all who love a good "yarn," the book will be attractive.

For sale by Messrs. Patch & Lewis.

California News—Additional by the Northern Light.—The Nicaragua expedition under Col. Walker was to have left San Francisco about the time the steamer sailed. It consisted of from 75 to 100 men, including Mr Achilles Kerver, Captain Hornsby, and other well-known individuals. The brig Vesta had been chartered to convey them down as emigrants.

Outside efforts to get up another trial to elect a U. S. Senator were quite vigorous, but the chances were very slim.

According to a letter from Sacramento, the question has assumed a new and rather complicated phase, as under a strict construction of the law in relation to elections in California, there appears to be no doubt but that Dr Gwin is entitled to the seat in the Senate.

The point seems to be the clause of the constitution which declares that a plurality of votes given at any election, shall constitute a choice, where not otherwise directed in this constitution. Dr Gwin having received a plurality of seven votes over Mr Edwards, on the first ballot in joint convention, it is contended, was then constitutionally elected.

It is said that the planting of wheat in the agricultural districts of the State had been much larger than any previous year, and this too with California Flour selling at $6 the barrel.

Two hundred and sixty-four ejectment suits had been commenced in San Francisco, in view of the expiration of the statute of limitation.

The market closed extremely dull, and prices had a slow, ward tendency. Hazall Four closed at $14; wheat 1 a 1¼ cts. per pound; New Orleans sugar 9½; Rio coffee 12½; anthracite coal $13; new butter 35 a 37½; mess pork $16.

The Shoe Business in Lynn. The Lynn Daily records the fulfilment of its predictions made in the winter, that there would be good business in the shoe trade this spring. It says:

"Our manufacturers have had Spring business. They have sold all out; cleaned out everything, and could have sold many more shoes for the Spring trade, had it been possible for them to have completed the orders in season. We do not undertake to speak for other shoe manufacturing towns, but such are the facts in regard to Lynn. The shoe business at this time is as good as ever it was in Lynn. Our manufacturers are all full of orders and full of work to complete them.—The wages of hands are up and coming up. No one who can make a decent shoe is out of employment; all are busy all doing well with a fine prospect ahead.

Two of our shoe manufacturers are at this time putting up houses for their own private residences, which will compare with any suburban mansion in the neighborhood of Boston or elsewhere. One of them, with the grounds, is estimated to cost no less than $40,000, and the other from $20,000 to $25,000. Another not long since completed, an establishment at a cost of $20,000 or more, and erecting a green house which will cost about $6,000. Isn't Lynn looking up? We think so."

Two Beers and No Napkin. The Belfast Journal is responsible for the following

"Our friend A—— went to the Marlboro' to "put up" for a New A—— is a man who has no objection to prayers in a hotel or any proper place, nor was he otherwise than pleased to find no polyglot Bible on the table of his room—among the morning, he performed the Jewish ceremony of ablution. Just at this moment when the soap began to steal into one's eyes, A—— discovered that he had no napkin. Our friend is not a violent man, but he rang with some emphasis, and the head clerk, in the absence of a waiter appeared. A—— took one of the two volumes in question in hand, and wiping the disturbing suds out of his peepers with the other, presented the volume to the clerk, with the request that he would swop off one of his Bibles for a napkin, which having used, he would apply himself to the study of Job. The exchange was made accordingly."

A letter in the Constitutionnel, from St Petersburgh, mentions a circumstance which has just caused some sensation there. A person of large property, M. G——w, having said at a private party, "I would willingly give 10,000 roubles (the rouble is somewhat over 1ft) for the war, if I knew when we are to have peace," was summoned next day before the military governor, who received him in the presence of several persons of distinction, and said, "Sir, if you pledge me your word to pay this day the sum of 10,000 roubles, I am authorized to gratify your curiosity on that point to which you alluded last evening." "I promise to pay that sum," repl ed the other—"Well, then," said the governor, "I have to inform you that we have peace when you come back from the Caucasus, where you are to proceed this afternoon, after which date you need pay the sum agreed on.—God be with you!"

The New York Courier and Enquirer thinks the Kansas difficulty, incited by Atchison, Douglas & Co, bodes no good to the country, particularly to the South, and regards the armed interference of the Missourians as a great blunder.—The Courier holds that the Nebraska act, and the subsequent events in Kansas have given the extreme anti-slavery men a power in twelve months, which they themselves could not have acquired in twelve years, and have weakened the moral position of the South more than all previous occurrences combined. We fear all parties endorsing the Missouri foray will live to rue the day when it happened.

To Sportsmen. Wash your gun barrels in spirits of turpentine, by dipping a rag or sponge fastened to your gun rod into be liquid and scouring them out three or four times, when they will be cleared from all impurities, and can be used almost instantly, as the turpentine will evaporate, and leave the barrels dry; even if they are a little moist, it will not prevent them going off, like water. After being washed thus, there is no danger of rust; as when water is used. I am an old an experienced hunter, and have practiced this for years and found it useful. Spirits of turpentine can be procured at all country stores, and a small quantity sufficeth.—*Cor. Scientific American.*

Coal. The Philadelphia Ledger of Saturday says the anthracite tonnage last week, by the three great transportation lines terminating in that city, reached the enormous aggregate of 133,335 tons—an amount unequalled in this early period of the season. The Ledger predicts that should this activity continue, prices will have to come down.

Railroad Tunnel between Dover and Calais.—It has been proposed to build a railroad tunnel under the English channel, between Dover and Calais, so as to establish a permanent communication between France and England. Several projects have been proposed; among them that of Dr. Payerne, who offers to perform the work, if supplied with 140 submarine boats, 1600 sailors and workmen, 4,410,480 cubic yards of material, and 240,000,000 francs. By means of such a tunnel the channel might be crossed in thirty-three minutes.

The Rose Case in New York.—Joseph Rose was arrested this morning on a civil process for debt. His counsel petitioned Judge Shaw for the issue of a writ of habeas corpus, on which he will be heard to-morrow forenoon, the point raised in his behalf, being that a member of the House cannot be arrested during the session. The question to follow, and upon which his counsel desire the decision of the court is, whether Mr. Rose is still a member of the House.—*Boston Traveller.*

Fusion in Syracuse.—Hon. Littlefield of the Skowhegan Clarion thus puts it on to some unknown scamp who sent him a fictitious marriage notice:

We would freely give ten dollars to find out who the miserable, contemptible city unhung scoundrel is that was the author of a really base, in order to spit out his spleen upon others. Such a dirty act deserves to be exposed to the torments of Musquitoes, Black Flies, with nothing but blue Water and salt for drinks, and free and unrestricted for food, for the remainder of his miserable existence.

Sebastopol. The New York Times remarks that it is not improbable that the next foreign intelligence will announce one of two facts, either that the Allies have taken Sebastopol, or that the Russians have destroyed the Allies.

The London Times prints a letter of more than ordinary interest and importance, as it states, it is from a captain in the royal engineers, and one of the three superior engineer officers on whom it will devolve to lead in the contemplated assault. On the 9th of April this officer wrote as follows:

"You ask me my opinion about the siege.—In the first place, I feel great diffidence in speaking about it, having had no previous practical knowledge of the subject. Then, again, our information concerning the resources of the enemy inside the town, is so uncertain and so contrad ctory that one has no guide to go upon. No one who has seen the awful strength of the defences, situate ung as they do complete ly round this side, with tiers of batteries and entrenchments one behind the other, and frequent salient points flanking the entire line, and bringing a tremendous cross fire upon every point, but must feel that an assault will be attended with far greater carnage than I would have been six months since. *And yet that assault must be made, and, in my humble opinion, within the next ten days.* God grant that it may be successful, *for on it will depend the safety of the entire army.* I know that the assaulting columns are told off, and the engineer officers who has to lead them, but it is kept secret.—There are at the present moment, in the left attack, only three engineer officers between whom it will be, for it will be a captain, and one of our captains was wounded three or four days ago. The chances are, therefore, two to one against it being me; but if it is, I shall, I hope, do my duty, and if I survive I do I have certain promotion. Any how, we shall get a clasp for the business, and it is one that must be done *sooner* or *later*."

More than ten days have elapsed and yet it certain no assault has been made. It will be remembered that, on the 25th of April, the telegraphic communication between Bowring at and the Crimea—between Balaklava and London—was completed, and that in four hours Lord Palmerston could have intelligence from Lord Raglan. It may be safely assumed that had there been a successful assault twenty days later than the date of the letter the news would have been spread through Europe.

The intelligence now close at hand must be of painful interest.

[The Baltic, now due at New York, is three days out from Liverpool, and her news may appear in our telegraph reports.]

The Lawrence Courier says:

"Last week the teacher in one of the school, discovered that one of the boys about twelve years of age, had in his pocket a bottle of poisonous candy from which he was in the habit of drinking in school; coming to shine at home he had been for some time keeping in cards, &c. Seeing as he could, until the teacher interested himself in procuring him clothes and food, it was found that he was in the habit of trading the latter with an Irish woman, for brandy. A day or two after this discovery, in some bit of excitement he jumped into the river and was drowned. The superintendent of the Schools, Dr. Pickard, is calling public attention to this fact."

For Europe. The tide of travel sets eastward. The European steamers of the Cunard and Collins lines are reported to have applicants with scant to fill all their berths for that month and the greater part of June, while the packet ships are full of passengers of all degrees. The Daniel Webster, of Train's excellent packet line, took out for Liverpool a cabin full of the class of passengers who formerly preferred a steamer's short voyage, and her successor will without doubt be equally well filled, so that those who would go in her must be swift to take their berths.—*Boston Courier.*

American Vessels in the French Service.—A letter from Marseilles communicated by the Paris correspondent of the National Intelligencer, gives the following list of American vessels which have been chartered by the French government:

Clipper ship Ocean Herald, 2200 tons, chartered at $5 per ton per month, and had just sailed with 180 horses and 1700 tons of *magasins*.

Ship Ticonderoga, 1500 tons, loading with 1200 tons of *materiel*, 200 horses, and 300 troops; chartered at $4.50 per ton per month.

Ship Emma, 1100 tons, same kind of cargo; chartered at 17 shillings sterling ($4.25) per ton per month.

Ship Great Republic 3,650 tons, and Queen of Clippers, 2,600 tons; the former chartered at 17s ($4.25) and the latter at 16s ($4) per ton per month. The former was expected to arrive from London, and the latter from Malta, and both to load with munitions and warlike stores, and deck-loads of horses.

Ship Kate Howe had sailed for Algiers to load with hay and barley for Sebastopol, at $11 per ton measurement for the trip.

Ship Anna Tift, loaded at Toulon, will stones at $ 6 per measurement ton.

Steamer William Penn, 600 tons, chartered at $10,000 per month, and the government to furnish coal.

Nineteen others have been chartered in England by the French government to proceed to Marseilles and Toulon, to convey horses, mules and stores.

Incidents at Paris.—In a recent letter, the Parisian correspondent of the New York Tribune mentions the following:

Two incidents in connection with the American department of the Exhibition in this city have been the cause of considerable merriment this week in the palace-building. Canada, which was placed alongside the United States, was allowed a space much too small for the exhibition of her products, while the United States had too much. Canada therefore asks for annexation, and she has consequently been regularly annexed to the United States. Her Commissioners were anxious for the annexation, since her products are generally classed here as understood as being American products. The other incident referred to was this: the American part of the Exhibition thus is in clear of boxes, and the spot being in the center of the building and in every way appropriate, it was chosen as the place for the opening ceremonies. In consequence, the workmen are now engaged in erecting an American ground two imperial thrones for their Majesties the Emperor and Empress of France.

Great Foot Race.—On the Cambridge course yesterday, a foot race came off between Grindell—who, as champion of New York, had challenged the pedestrian world to a trial of speed—and Stetson, who, as champion of New England, had previously vanquished all competitors. The distance was ten miles, and the stakes $1,000 a side. Much excitement was manifested as to the result, and the sporting world was fully represented on the occasion. The track was in good order, and the weather pleasant, though rather too warm for such severe exercise. The race was won by Grindell, the New Yorker, who performed the distance in 57 minutes 22 seconds, Stetson coming in 41 seconds behind his successful antagonist. A good deal of money changed hands on the issue of the contest.—*Boston Courier.*

Gardiner Bridge Co.—At a meeting of the Stockholders of the Gardiner and Pittston Bridge the following gentlemen were chosen Directors for the current year, viz: Stephen Young, John Jewett, F. T. Talley, Wm. R. Gay, W. L. Lewis, A. H. Clark, Clerk.

At a subsequent meeting of the Directors, John Jewett, Esq., was chosen President of the Board of Directors, and Stephen Young, Esq., Treasurer. The affairs of the Company are represented as in a prosperous condition.

[*Advertisement.*]

A Remarkable Man—and a Universal Remedy for Disease. This city is now the home of one of the most remarkable men of the age, a man who has traversed the civilized globe and established in almost every country where he has visited, the sale of his medicines for the *relief of human suffering*, and which are a certain cure for disease in all its forms. We allude to Professor Thomas Holloway, of London. It is now several years since this benefactor of the human race first proclaimed to the world, through the British press, that he had after deep research, prepared a remedy that was sure to eradicate disease. Years of patient investigation into the laws of human physiology which control our bodies in health and when diseased, led to the invention and preparation of the world renowned Holloway's Pills and Ointment. Nearly if not quite one half of the human race have taken his medicines.—His name is as universally known over the globe as that of Alexander, Napoleon or Washington, when in the height of their ambitious careers. If they conquered nations on the field of battle, Professor Holloway has, with no weapon but science, conquered *disease* in all its forms. His victorious career is bounded by no imaginary lines of latitude and longitude, save those marking the confines of civilization itself. No isolated country or nation was sufficiently extensive for the operation of his enterprising and gigantic intellect. Wherever disease has a residence, there he has penetrated with his medicines, and left an enviable and enduring reputation. After enlightening Europe, his fame spread over Asia, and the civilized portions of Africa, and finally appeared in America. He has translated the cures he has performed, and the virtues of his medicines, into as many languages as missionaries have the Bible—Governments, otherwise the most despotic, have been forced by the great value of his medicines, and their popularity with the people to remove antiquated and time honored restrictions upon the introduction of foreign medicines, and open their custom houses to a *free introduction* to the *pills* and *ointment* of this distinguished man.—Empires and kingdoms removed the barriers of age against the introduction and sale of proprietary or patent medicines, and freely permitted Holloway's medicines to become the physician of the masses.—*N. Y. Despatch.*

A Church of the Revolution in New Jersey. The "Old Tennent Church," at Monmouth, is amongst the last remaining relics left of the state of things as they existed prior to the revolution. The Enquirer states that bullet holes are still seen in the walls, and the interior is stained with the blood of a patriot, who bowed from wounds received in his country's cause. The old church stands as a monument in those who fought and died on that old field. The old parsonage where Washington quartered the night after the battle, is still standing. A movement was made to tear down the old church and rebuild on its site a structure of more modern date, but at the last meeting of the members, on account of the veneration of the people at the idea, they resolved to fit it throughout, and make all necessary repairs. So that this old church which has stood so many generations, will probably stand another. Rev. L. H. Van Doren, its pastor resigned his charge on Sunday week.—*Newark Advertiser, May 9.*

The Sailor Sold. Last week an auctioneer put up his flag in one of the back streets for the sale of a house. For some days previous the people of that neighborhood had been alarmed by rumors of the small pox, and seeing the flag, their worst fears were confirmed. Not a person passed through the street that day, and at the hour of sale the auctioneer found himself alone on the premises.—*Newburyport Herald.*

NEWSPAPERARCHIVE®

TELEGRAPHIC

FROM THE DAILY WHIG AND COURIER

Various Matters.

New York, May 17.

The mate of the American schooner Bay State writes a long letter from Rio Janeiro, explaining the alleged outrage committed upon that vessel by the British brig-of-war Bonnita. According to the mate's version of the story, the difficulties were all occasioned by the obstinacy of Capt. Wardell, of the Bay City, in refusing to haul down the colors on heaving to, necessitating a firing of seven or eight guns from the Bonnita in order to bring the schooner to, and finally then that she was not a Russian vessel.

A requiem hospital recently erected by the Jews of this city, as a testimonial to the memory of the late Judah Touro, was consecrated to-day with much ceremony.

A Savannah dispatch says that when the sloop-of-war Jamestown was at Key West, the division between the grand room and the gun deck was taken down leaving the whole deck clear for action, which is not usually done except in time of war. It is argued from this fact that our relations with Spain are in a critical condition.

No News from the Steamer.

Philadelphia, May 17. No signs of the steamer this morning. Weather clear and mild.

Springfield, May 17.

Eight employees of the western railroad in this city were arrested to-day for stealing from the cars. The officers are in search of others.

Know-Nothing Nomination.

Louisville, May 17

The Know Nothing convention now in session here has nominated Hon. Humphrey Marshall, late commissioner to China, as their candidate for Congress from this district.

Stocks dull. Money unchanged.

The Portland Advertiser says that on Tuesday while the workmen of Dr. John Cummings of Richmond's Island, were ploughing on the westerly side of the island, they turned up a pot containing seventeen gold coins of Charles II time, several pieces of silver, and a ring. The coins bore upon one side the following inscription and device:—In the centre head of Charles II, with XX.—Surrounded by the words, CAROLUS D G. MAG. BR. FR. ET HIB REX

"FLORENT CONCORDIA RESPA."

The gold coin was as bright as though just from the mint. By whom it was deposited remains a mystery. Richmond's Island was one of the earliest spots settled in Maine, and contained quite a large population for its time.

The Argus says that upon the outside of the ring were the letters "G. V." and on the inner surface the words, "United Hearts death only parts."

New York, May, 16. The steamship Atlantic sails at 2 o'clock this afternoon. Among the passengers are Mr. E. D. Morgan, Governor Pringle and Washburn, a score of Congressmen who intend making a four months tour in Europe, Ex-President Fillmore, Gen. C. F. Jones of R. I., Col. Sam't Col., and others.—The exact amount of specie taken out is $1,-291,401, the largest shipment ever made from this port by one vessel.

"Cottage Grove," the residence of the late Moses Hale, in Westbrook, has been sold to W. Brown, Jr., late of Bangor, for about $15,000.—Portland Advertiser.

From Havana.

New York, *May* 16.—The U. S. Mail steamer Catawba arrived here this morning. She brings New Orleans dates to the 9th and Havana to the 12th, two days later than those brought by the Granada. We have not much of importance from Havana.

It was generally believed that the U. S. Gulf Squadron would soon return to Havana. The Princeton and Jamestown were cruising off the coast. Commander McAuley was at Key West.

A rumor prevailed at Havana that Gen. Concha would pardon M'Fadle.

The organizing among and drilling of the colored population of Cuba still continued.

Yucatan Indians continue to be introduced into Cuba under the consent of the Mexican authorities. Nearly 200 of them were landed at Havana on the 11th, from a Spanish brig, and sold under contracts made previous to their arrival. It is said they were brought away by force.

Havana continues healthy, and business as usual for the season. A report that it existed on the 11th that 3 out of the prisoners who were imprisoned in the prison ships had escaped.

Accident at Yarmouth.—A young man by the name of Daniel B. Needham, about 20 years of age, in the employ of Mr. Nathaniel Cooch, of Yarmouth, went into Mr. Cooch's mill the morning to grind an axe, and either not understanding the movements of the gearing connected with it exactly, or they becoming in some way entangled, it was evident that he had let the water on so the shaft to carry the grindstone, and the bolt becoming entangled about the stone and the frame on which it stood, and, by this means the stone and frame were both drawn up to the shaft on which it operated, and in this way one end of a plank on which he stood was pushed from its resting place and precipitated Mr. N. some 10 or 12 feet to the bottom of the shaft, then in rapid motion.—When he was found, which was in a minute or two after he fell, the shaft, judged to weigh more than a ton, was removed from its proper post on and resting in a great measure upon the unfortunate man. Life was extinct.—[Portland Advertiser.

New York, May 16th.—Great excitement attended the announcement of Baker's capture and return to this port, and we are this morning covered with minute details of all the attending circumstances, but they present nothing of striking importance. Baker was arrested without difficulty, passing under the assumed name of Brown. He stated his intention was to get to Constantinople, and then to the Crimea.

A gentleman has purchased three lots of ground at Keokuk, Iowa, from Ex-Governor Seymour of New York for the sum of $10,-000. This property could have been bought in the year 1840 for $100.

California Steamers,
Carrying the United States Mail.

Through Tickets including transit of the Isthmus, via Panama R. R.

5th and 20th of each Month.

By order of the Postmaster General, the United States Mail Steamers will hereafter be despatched from New York direct to Aspinwall, on the 5th and 20th of each month, excepting when these dates occur on Sunday, and then the days of sailing will be postponed to the following Monday

Arrangements have now been completed so that the regular U. S. Pacific Mail Steamer will leave Panama for San Francisco immediately on arrival of the Atlantic mail and passengers, thus securing passengers by the Mail Line, a sure and short passage, without any detention on the Isthmus

Passengers are landed at the Railroad Depot, Aspinwall, free of expense. The Railroad being completed, and Cars running through to Panama, four hours only are required for crossing the Isthmus

Tickets must be signed by one of the Company's Agents, before they will be recognized, by the Agent at Panama, and Tickets thus signed can be obtained at the Only authorized Agent for the Pacific Mail Steamship Company in this city

Stray Logs.

NOTICE is hereby given that the stray logs which came through the boom last year have been scaled, and that there are 1125 sticks in Pet Cove, making 168,140 feet, and at the Reed Boom, in Stillwater Stream, near the Poor House, 461 sticks, making 81,687 feet. The marks, and number of logs of each mark, may be found at the office of the Treasurer, No 6 Granite Block, Bangor, and at the lower boom, and any person owning any of said logs, after paying the expenses which have accrued on the same to the Treasurer, and given a receipt therefor, can take them away.—Such as are not soon so taken will be manufactured, and the proceeds thereof kept for the owners.
E. E. PRENTISS,
may2—3w Treasurer of P. I. A.

NOTICE.

THE Bonds of the City of Bangor, issued to aid the construction of the Penobscot & Kennebec Railroad, payable in twenty years, with coupons for semi-annual interest attached, are for sale at the office of the Treasurer of the P. & K. R. R. Company, Bangor.
ELIAS MERRILL,

PATENTS.

American and Foreign Office

AGENCY FOR BUSINESS
WITH U. S. PATENT OFFICE,
WASHINGTON.

No. 76 State Street, opposite Kilby St.,
BOSTON.

MODE OF PROCURING INFORMATION in Inventors.

The subscriber, late Agent of the U S Patent Office, under the Act of 1837, determined to present advantages, in applying for Patents superior to those offered by others, by his unique arrangements whereby the applications are prepared and conducted by him, THE VERY SOLE Examination of the case, in part look by others, to be resolved by him for the case of a failure to obtain a patent, and the withdrawal thereupon from within thirty days after rejection Caveats, Specifications, Assignments, and all necessary papers and drawings, for procuring patents in the United States and foreign countries prepared, and all matters touching legal and scientific matters respecting inventions, and infringements of patents.

Inventors can obtain their specifications on the most reasonable terms, but can avail themselves of the experience of 15 years practice, an extensive library of legal and mechanical works, and correct accounts of patents granted in the said and other countries, by which means saved a journey to Washington, and a stay of days, as well as all personal trouble and distance from the Capital Copies of claims of any patent furnished by remitting one dollar Assignments recorded at Washington

R. H. ELLIOT,
Solicitor of Patents

During the time I acted as the office of Commissioner of Patents, R. H. ELLIOT, Esq. of Boston, did business at the Patent Office, as Solicitor of Patents. I have reason, willingly, personally to speak of his skill as much business took to the Attorney and there began how to conduct himself in the most skillful, faithful, and correct. I regard Mr Elliot as one of the best informed and most skillful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at Patent Office

EDMUND BURKE."
Late Commissioner of Patents.

DR. J. H. SCHENCK'S
PULMONIC SYRUP,
For the Cure of Consumption.

THE propriety of this medicine was thoroughly manifested many years ago, reduced as low as to be given up by his physicians and friends, to the last stage of Consumption When all symptoms of rapid greening s Had fail, he was strongly recommended to use a syrup made from an old Indian receipt, which he readily procured, effectually curing him. The medicine soon found a large number of respectable persons testified to the facts of this case, and soon his Pulmonic Syrup established a reputation not equalled in that section of the country. Creation, as these age did, manifestation opened to the notice of mankind, Dr Schenck was induced to introduce the Syrup with the same method now in use. In fact, such was the notoriety of this medicine, that many physicians had their attention directed to it, from reputation of it, from having witnessed its cure their powers, and freely extended the hand of friendship and encouragement to Dr Schenck, for introducing the medicine to the public and investing in their daily practice.

No other medicine operates upon the system in the manner that the Pulmonic Syrup does It prepares a healthy action upon the morbid parts, by purifying them from disease, it promotes the expectorations, loosens the cough, ripens the matter on the lungs, and when it is discharged, it heals the opening that the breaking of the tubercles or abscess produces, and the lungs become sound and resume their performance of their natural functions, it also restores the diseased portion of the lungs, and other organs, and thus restores the system to health. I suppose it property the curative powers over all others in, that it contains no opium, calomel, or any other deleterious ingredient

In 1841 Dr Schenck removed from Huntington New Jersey to Philadelphia, and commenced the practice of this profession where he soon acquired a reputation extended by none, in curing a disease that had before been deemed incurable, as he has since then daily presented the world unanswerable evidence of his success

Both of this parents died with Consumption, which appears to have been an hereditary disease with his father's family. All his brothers and sisters except one, and early of this disease, none of them, but the one brother, reach ng the age of twenty

Thus he is near the last of his family, he naturally felt some alarm, as one after another were consigned to the silent tomb by this fell destroyer

VOLUNTARY TESTIMONY.

We, the subscribers, residents of Huntington, do hereby certify that we are well acquainted with Dr. J. H. Schenck. He was attacked by disease, which, as we believe, terminated in Pulmonary Consumption, under the operation of which he was reduced also low as to be unable to leave his bed for a long time, and to all appearance was past recovery. He is now perfectly well—his cough and fever all left him, and he feels justified in declaring it as our belief that these salutary effects have resulted from the use of the Pulmonic Syrup.
